

## Motorized Bioclimatic Pergola Luxury Screens

Pergolas with bioclimatic technology and modern design. Control the natural light. Work very well in rainy weather and protect your spaces with the push of a button. Transform and enjoy your environments to the fullest with this innovative solution!

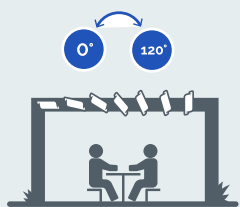

**A Motorized system of aluminum slats provides shading and protection against climate change.**

Thanks to its rotating slats, you can freely control the passage of natural light or shade automatically with the simple touch of remote control. Bioclimatic Pergolas are ideal for terraces, gardens, roof gardens, and commercial applications.

### Benefits

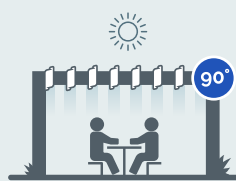

- Automated light and shadow control.
- Waterproof cover.
- Perimeter drain for rainwater harvesting.
- Elegant, modern designs and custom finishes.
- Safe and adaptable structures to any architecture.
- Professional installation by our experts.

Free rotation of the slats from 0° to 120° allows maximum use of the pergola in different weather conditions.

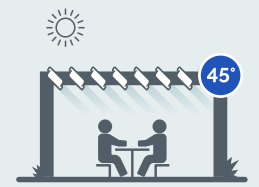

The roof at 0° remains closed and offers maximum protection against all types of weather.

Slats at 90° allow sunlight to enter.

120° slat allows full entry of light, even at sunset.

At 45°, they allow partial sunlight and lighting control.

### Features

- Made of extruded aluminum.
- Light and durable.
- Resistant to corrosive environmental elements.
- Special drainage system.
- Noise absorption and silent operation of the slats.
- Hidden motorized system.
- Lighting options.

### Types of Bioclimatic Pergolas

- Four columns.
- Three columns.
- Two columns with slats parallel to the wall.
- Without columns.
